Park Advisory Commission Memo

Date: February 20, 2025

Presented to: Park Advisory Commission

Presented by: Grant MacFarlane, Assistant City Administrator

Department: Administration

Reference: Arbor Day 2025

Method: New Business

Background Information:

In 2020, the City of Wyoming became a member of the Tree City USA program. The Tree City USA program began in 1976 and is a national program that supports community tree management. Trees are a critical part of a city's infrastructure. A healthy forestry program helps to protect groundwater, reduce energy costs, support erosion control, and boost property values.

In order to maintain the City's Tree City USA status, the City must hold an Arbor Day celebration and issue a proclamation for Arbor Day. Arbor Day falls on Friday, April 25th in 2025. Staff is planning a Tree Planting event on Saturday April 26, 2025. Staff is currently working to finalize details.

Recommendation:

Proclaim Friday, April 25, 2025 as Arbor Day in Wyoming, Minnesota.

WHEREAS: Trees are of great value as they provide clean air and water, shade and energy savings, wildlife habitat, recreational opportunities, wood products, and jobs while capturing and storing carbon from the atmosphere, thereby offsetting greenhouse gas emissions; and

WHEREAS: Properly planting and caring for a diverse mix of trees makes community forests more resilient by minimizing the impacts of diseases, insects, and other stressors such as climate change and providing long-term community and environmental benefits; and

Park Advisory Commission Memo

Date: February 21, 2025

Presented to: Park Advisory Commission

Presented by: Grant MacFarlane, Assistant City Administrator

Department: Administration

Reference: Fireside Park Proposals

Method: New Business

Background Information:

The Park Advisory Commission (PAC) has been exploring potential projects for Fireside Park to reintroduce a playground and related features to the park. The PAC authorized a Request for Quotes to be sent to playground manufacturers and distributors to see what a project may look like with a cost not-to-exceed \$70,000. The RFQ was sent to 10 manufacturers to receive their proposed playstructures and quotes for the project. Each proposal was to include engineered wood fiber, concrete curbing, play equipment, and the total cost for equipment and installation. Additionally, the RFQ noted a preference towards the inclusion of swings, independent play features, and a nature theme.

The City received responses from six of the organizations which were contacted. There was no limit on the number of projects that each organization could propose, which resulted in a total of 10 proposals being received from the six contractors.

Quotes Received:

Each proposal has varying scopes, features, and costs. All proposals with renders have been included for in-depth review within this packet. The below is to provide a very basic summary detailing the name of the company and cost for their proposal(s).

1. KOMPAN, Inc.

Located in the St. Paul area, KOMPAN's offer includes selling materials at cost due to their president having been raised in Wyoming. The base quote for each proposal assumes the use of plastic borders, but they have also included the total cost for upgrading to concrete.

- a. Robinia Nature Play - \$63,595.05
- b. EcoCore Structure - \$69,962.57
- c. Robinia Nature Play 2.0 – \$78,346.36

2. MWP Recreation

CITY OF WYOMING

P.O. Box 188, 26885 Forest Blvd., Wyoming, MN 55092
Phone: 651-462-0575 Fax: 651-462-0576

Located in Golden Valley, MN. MWP Recreation also offers the annual GameTime Grant which is set to open once again in 2025. This grant matches the funds that a City puts towards a playstructure which exceeds \$75,000 in cost.

- a. MWP Fireside Park Proposal - \$70,000.00

3. Northland Recreation – Little Tikes Commercial

Located in Woodbury, MN. This proposal includes numerous nature aspects including tree-topper décor, “Lola” the snail, and a gator walk.

- a. NR Fireside Park Proposal - \$70,000.00

4. ProPlaygrounds

Located in Tallahassee, FL. This playground manufacturer provided two options to the PAC which contain the same equipment but differ in shape and square footage of the proposed park area. This manufacturer only provides plastic park borders.

- a. PP Fireside Park Proposal 1 - \$59,999.00
- b. PP Fireside Park Proposal 2 - \$67,999.00

5. St. Croix Recreation

Located in Stillwater, MN. This proposal includes a playstructure which was originally manufactured as a show structure for the National ASLA (American Society of Landscape Architects) Expo. This product has been heavily discounted because it is already pre-assembled, while still being “new” as it has not been used in a real setting.

- a. SCR Fireside Park Proposal - \$70,000

6. Webber Recreation

Located in Hastings, MN. Webber has provided two proposals of similar price points but with very different designs. Webber has incorporated various nature-centric design elements into each proposal.

- a. WR Fireside Park Proposal 1 - \$69,918.52
- b. WR Fireside Park Proposal 2 - \$69,926.50

All of the contractors have confirmed that they would hold the price of these proposals through the end of March to allow for the Park Advisory Commission and Council process to take place, should the PAC elect to move forward with any project.

Recommendation:

Attached to this memorandum are the full details, designs, and quotes from each of the six vendors. Staff recommends that the PAC review these materials and provide direction on next steps.

Introduction

City of Wyoming,

On behalf of KOMPAN, it is a pleasure to provide our proposal for this project, from specific site work to quality play equipment. We have listened to your project requirements and created a proposal with three options, based on budgetary expectations, and Park Commission requests.

Using over 50 years of experience in playground design, it is important to KOMPAN that the users of our playgrounds are safe, have fun, and feel socially included. With this in mind, our products are designed to stimulate children's development physically, intellectually, socially, cognitively, and emotionally.

KOMPAN is a member in good standing of the International Playground Equipment Manufacturer's Association (IPEMA). Through IPEMA's third party validator TÜV SÜD, IPEMA certification assures compliance of our play equipment to ASTM F1487 for the US and CSA Z614 for Canada. Playground surfacing materials are also validated through IPEMA. All equipment manufactured by KOMPAN is to ISO 140001 requirements. The sustainability credentials of our products are verified by Bureau Veritas.

We look forward to helping you develop the best possible space for your community.

Letter from the President

Dear Grant MacFarlane and City of Wyoming Park Advisory Commission,

I hope this letter finds you well. My name is Jethro Montzka, and I am writing to you with a deep sense of gratitude and excitement. I had the privilege of growing up in Wyoming, MN attending elementary school there (way back when the schoolhouse was located in the town center), and cherishing countless memories at the playgrounds. In fact, not far from Fireside Park is where I played my first games of T-ball! Today, I am honored to serve as the President of KOMPAN, the world's largest playground and fitness solutions provider.

It has always been my ambition and dream to give back to the community that laid the foundation for my life. The news of a new playground being planned for Fireside Park fills me with joy and a desire to contribute to this wonderful initiative. I believe that playgrounds are not just places for children to play; they are vital spaces for community building, learning, and growth.

Thank you for considering KOMPAN to support this opportunity. I look forward to the possibility of working together to create something truly special for the community.

Warm regards,

Jethro Montzka
President

Project Requirements

Budget USD \$70,000.00 to include...

- Engineered Wood Fiber
- Curbing
- Play Equipment
- Installation for all the above
- Mix of Play Equipment to be suitable for a wide range of ages
- Swings Included
- Independent Play features
- Nature Theme

Design Rationale

KOMPAN believes that the best designed play areas not only provide a space for communities to come together, but a space for children to let their imaginations run wild. **'PLAY THE KOMPAN WAY'** helps us achieve this in the most effective way possible. This is comprised of three factors; **WOW, STAY & DEVELOP**... Giving us a gateway to fantastic play area solutions.

For the City of Wyoming at Fireside Park, we felt that these three distinct factors were required to produce the best play area options for the site, and for the children.

WOW

The WOW is found in the unique material selections of our naturally rot resistant, robust Robinia hardwood or our play structure made with EcoCore panels from recycled material – each solution providing a respect and connection with nature, multiple climbing types, unique features and thrilling independent pieces. The options we are providing have tremendous play value, kids won't know where they want to begin their play!

The net play will bring thrilling climbing. The unique pieces will excite the youngest park goers and the different play options will benefit all!

STAY

There is so much to do and activities to try, there will never be a bored child. Beyond the obvious, there are small details everywhere that will keep all ages engaged physically and cognitively.

Physically, you will find static and dynamic climbing features, balancing opportunities, spinning, springing, swinging and sliding.

Cognitively, there are outlets for creativity, problem solving, turn-taking, cause and effect and even areas for socializing.

Research has proven that kids stay on KOMPAN play equipment longer than other play equipment.

DEVELOP

The many different climbing and balancing options give kids endless challenges to accomplish visit after visit.

Even the Garden Seesaw and Parkour 4 have various ways to approach, for different levels of ability.

We want Fireside Park to be a place where kids can't wait to visit – a hidden gem in the City of Wyoming. Where they will feel the **WOW**, where they will want to **STAY** and play again and again, and where they will **DEVELOP** great relationships along with physical and cognitive skills. We truly hope we can work with you to bring this to life and your wonderful community!

Solution Proposal

Providing two main options with equipment suitable for various ages to include swinging, independent play and a connection to nature through material and equipment selection. A third option is shown as an alternate, sharing extra play options at a slightly higher price point – for reference purposes.

BASIC SERVICE AGREEMENT FOR ORGANIC ROBINIA FROM KOMPAN

With any playground, it is necessary to perform maintenance to keep equipment current, safe and attractive.

Playground equipment made of Robinia wood is no exception. In changing weather conditions (wet/dry - hot/cold) cracks will appear over time.

We at KOMPAN wish to make sure that your new Organic Robinia playground is maintained consistently, and any issues are properly handled.

Our basic service agreement ensures that the playground is inspected and maintained regularly according to the KOMPAN maintenance manual to increase ease and convenience for you as a customer.

WHAT IS ROBINIA?

Robinia is a natural and organic material. Each piece of Robinia could potentially contain branch knots, wind scratches, openings in the surface and other natural patinas, similar to other types of wood. The appearance of Robinia wood changes according to weather and humidity conditions. This is not a flaw but natural and expected behavior.

Compared to non-organic materials Robinia provides each user an unique experience and can open the gate to an imaginary world. Children discover and learn from the organic variation on the surface of the wood, and can incorporate these natural elements in their play. For example, a branch knot is rapidly transformed into a "Start Button" or "The All-Seeing Eye."

The natural rigidity in Robinia wood sometimes causes cracks, or checks, at the end of the pieces, or openings on the side of the post. These checks do not affect the strength of the structure and do not cause any additional risk of attack from rot and fungus. They are a natural reaction that occasionally appears on Robinia and are usually not a safety or quality issue.

However, during routine inspection and maintenance severe deformation must be taken into consideration when appearing on vital areas inside the play structure. For example if a crack appears nearby a play area where there is frequent contact (slides, fireman's pole, etc.) and the potential for getting fingers stuck occurs, it is important to fix immediately. At installation, each of the checks and scratches is taken into consideration according to current safety standards. If a wooden deformation does not conflict with the current safety standard, it is considered a beneficial property provided by the organic material.

CHECKS AND OPENINGS

Checks along the lines of the pieces are to be expected, depending on changes in humidity and temperature.

Minor checks do not affect the integrity of the wood and will not require any action. In the event that they conflict with the allowed tolerances described in current safety standards, or any other local regulations, a repair is necessary according to the maintenance instructions.

KNOTS

Knots occur as a natural part of Robinia wood. The knots indicate where branches have been attached to the timber. During production, all posts are carefully inspected, and damaged pieces are discarded.

If knots are removed or fall out over time, the hole may need repair according to the maintenance instruction. This should be checked as part of the routine inspection.

EXAMPLES OF NATURAL BEHAVIOUR FROM ROBINIA WOOD...

ACCEPTABLE BEHAVIOUR

Checks and openings are a natural occurrence for any type of wood.

FLAWS COVERED BY KOMPAN'S WARRANTY - AND WHAT KIND OF SUPPORT CAN I GET?

At KOMPAN we hope you have a playground you love for a long time. To address the development of checks and other issues, we have included a basic service agreement with your Robinia order.

In changing weather conditions (wet/dry - hot/cold) checks or flaws may appear in Robinia over time. Checks requiring maintenance need to be maintained in accordance with Kompan's maintenance instructions.

The basic service agreement minimizes your risk with a professional playground inspection once a year.

If a check appears in the Robinia wood that affects the structural integrity of the play piece, then KOMPAN's 10-year warranty will cover the repair. In such cases, notify your local representative with the information detailed below and a repair, new post or compensation for repair will be provided by KOMPAN.

In order to evaluate whether a check affects the integrity of the structure we require images that clearly show: 1. the check (up close), 2. the post and 3. the full structure along with an explanation. Our support center will then process the case and get back to you with instructions on how to handle the issue. Please contact your local representative for more information.

* 10 years warranty against failure due to defects on engineered Robinia wood, based on correct installation and maintenance of the equipment — according to KOMPAN's installation and maintenance instructions. See general warranty conditions for more details.

SERVICE PACKAGE	*ANNUAL VISITS	ACTIVITY	INCLUDED COSTS
BASIC SERVICE PACKAGE	1	Inspection	Labor Equipment
		Repairs	Labor Equipment Consumables
EXCLUDED	Transport time to and from the playground		

* The service package is provided for one year for Robinia projects valued at less than \$50,000, and two years for projects valued at higher than \$50,000 unless otherwise specified.

DURATION OF SERVICE CONTRACT

Robinia wood will experience the most changes during the first one to two years of installation. Over this drying period the wood will stabilize and adjust to the local environment, and the need for this level of inspection and repair will decrease.

The service agreement therefore covers a period of one year—unless otherwise specified.

However, as the playground will still require care and attention (described in the maintenance manual), we recommend continuing the service agreement after the specified period to ensure years of safe play.

Please contact your local KOMPAN consultant for more information.

DISCLAIMER

It is important to note that the KOMPAN service packages do not include or replace an annual safety inspection as outlined within the maintenance manual.

The responsibility of maintaining a safe playground rest on the owner of the playground, regardless of possessing a KOMPAN service agreement.

In case any safety issues appear we recommend contacting your local representative for immediate repairs. Please note that this is not covered in the KOMPAN service agreement.

BASIC SERVICE PACKAGE

Annual Visit

Complete inspection of the Robinia playground equipment for defects.	✓
Complete inspection and retightening of all loose bolts and caps to compensate for natural changes in Robinia.	✓
Removal of splinters and rounding of edges on major checks, or repair to remove potential finger trap. Repair or replacement of parts that show structural integrity has been compromised.	✓
Inspection of chains for seats, swings and suspended rope elements.	✓

This basic service package is separate from the KOMPAN 10-year warranty. The warranty applied to failures due to defects on engineered Robinia wood, based on correct installation and maintenance of the equipment according to KOMPAN's installation and maintenance instructions. See general warranty conditions for more details.

Repairs other than to reduce checks that would be considered finger traps according to prevailing safety standards, are NOT covered by the service packages. Such repairs will be quoted for separately.

KOMPAN's service packages do NOT include OR replace the annual safety inspection.

The service packages cover basic maintenance of the Robinia equipment. The price includes labour, equipment and consumables to carry out the maintenance described in the service packages. The service package is provided for one year for Robinia projects valued at less than \$50,000, and two years for projects valued at higher than \$50,000 unless otherwise specified.

Project Scope:

Please note, installation is based on site being ready prior to our arrival to install play equipment as well as site conditions that have been conveyed to our organization by the owner/owner's representative and/or ideal conditions existing for a timely completion of your project as quoted. Unless addressed prior to the installation quote being issued or specifically mentioned herein, any issues that arise that impede the progress/completion of your project as quoted will result in additional charges.

Weather can change project scheduling in many ways. Take rain for an example. Day, or days, before rain... If weather forecasts show a high percentage chance for rain that will effect the site conditions, a postponement may be in order. Digging holes, laying certain surfacing materials, etc., are greatly affected by weather conditions and work may not begin/continue due to weather forecasts. There's the rain days themselves, which if heavy enough rainfall occurs, makes a site unworkable. Day, or days, after rain... Drying time will be needed after rain and the number of days needed will vary depending on amount of moisture received. One actual rain day may equal multiple delay days depending on work scheduled to be done.

- Sitework of any kind such as, but not limited to, grading (play area to have max slope of 1%), site restoration, drainage, etc.
- Removal of existing play equipment, border, safety surfacing, etc.
- Backfill and compaction of backfill after removal of existing items (for footing holes as an example) that leave voids in area (marking and digging of new footing holes based on workable site)

additional charges will be required to bring on site temporary/portable restrooms. These temporary facilities will be removed once your project has been completed.

- Short term maintenance, check manufacturer's owner's manual recommendations for maintenance and always follow these written instructions. To help set up short (and ongoing) term maintenance, use the first twelve months to regularly check equipment (such as, but not limited to, tightening hardware, checking moving features, etc.). Twelve months allows use in all seasons and will provide a better understanding of what will be necessary for your ongoing maintenance. This short term schedule will be based on the amount of use the play equipment is getting as well as the type of play event that is being played on. Activities with movement have a more dynamic play which can lead to more maintenance due to the nature of the motion but also because these types of play events tend to be more popular. Static features may require less attention during the short term and ongoing maintenance as inspections will determine frequency of maintenance needed for these events. There may be a need for scheduled lower and higher frequency inspections.

- Ongoing maintenance, check manufacturer's owner's manual recommendations for maintenance and always follow these written instructions. After short term maintenance period is done and data is collected for that time period, an ongoing schedule should be implemented. The ongoing maintenance can change with age and greater use. There may be a need for scheduled lower and higher frequency inspections.

Should weekend work be necessary or non-standard hours be worked, please provide a site contact and the best telephone number to reach this person in case an urgent matter arises requiring immediate attention.

COMPLAINT

Industry standards set a minimum level that playground manufacturers must meet. We meet or exceed those standards, because we understand that the ultimate playground offers peace of mind, as well as playful experiences.

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

Several key people at GameTime, including our Manager of Compliance and Standards, serve on the ASTM committee that sets the standards for the entire playground industry. GameTime products conform to that standard, ASTM F1487-07, the Standard Consumer Safety Performance Specification for Playground Equipment for Public Use.

CPSC

The Consumer Product Safety Commission is an independent agency within the United States Federal Government with the authority to inform the public of current product safety performance information and recommended practices. The CPSC first published their guidelines for public playgrounds in 1981 and have updated their publication since then. The current CPSC Handbook for Public Playground Safety, publication #325, is an excellent guide for owners and operators of public play environments.

IPEMA EQUIPMENT CERTIFICATION

GameTime is one of the founding members of IPEMA, and several of our people serve as board members, committee members and chairpersons of the association. In the interest of public playground safety, IPEMA provides a 3rd party certification, to validate conformance to established standards. Our use of the IPEMA seal is your assurance that GameTime has received written validation from an independent lab that the products associated with the seal conform with the ASTM standard, as well as the Canadian CSA standard CAN Z-614. A list of our validated products may be found on the IPEMA website, www.ipema.org.

IPEMA SURFACING CERTIFICATION

GameTime's GT Impax product provides you with the assurance that our surfacing has been certified as compliant to the appropriate ASTM standard. In the interest of public playground safety, IPEMA provides a third party certification to validate a manufacturer's conformance to the ASTM F-1292-99 Standard Specification for Impact Attenuation of Surface Systems Under And Around Playground Equipment. The use of the IPEMA Certification Seal displayed above signifies that the manufacturer has received written validation from the independent laboratory that the product associated with the use of the seal conforms with the requirements of ASTM F1292-99. A complete list of our validated products may be found on the IPEMA website at www.ipema.com.

ADA

GameTime is the only manufacturer to have a lab partnership with an Institute for children with special needs, so that we can develop and test our accessible products for superiority before bringing them to market. GameTime is also the only manufacturer to meet accessibility guidelines on all of its pre-designed PowerScape Plus and PrimeTime playground plans. We also recommend accessible surfacing options. For more information, log on to www.access-board.gov

ISO 9001:2000

GameTime is the first playground manufacturer to obtain the ISO9001:2000 standard. In order to obtain this certification, the company's manuals, policies, objectives and quality procedures are closely examined during a surveillance audit by ISO representatives. Strict attention is paid to policies and procedures in manufacturing, communication channels, system monitoring, customer relations and order processing, which are reviewed for consistency and standards. Companies who meet the standard are awarded the ISO designation.

TUV

An international organization that is a European Union Notified and Competent Body, providing testing and certification. Use of the TUV seal demonstrates that products have passed a comprehensive testing procedure based upon the European Harmonized Standard for Commercial Playground Equipment, and that the GameTime plant is regularly monitored by TUV.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IF THE FOREGOING DISCLAIMER OF ADDITIONAL WARRANTIES IS NOT GIVEN FULL FORCE AND EFFECT, ANY RESULTING ADDITIONAL WARRANTY SHALL BE LIMITED IN DURATION TO THE EXPRESS WARRANTIES AND BE OTHERWISE SUBJECT TO AND LIMITED BY THE TERMS OF BURKE'S PRODUCT WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OF CERTAIN IMPLIED WARRANTIES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

Warranty Exclusions: The above stated warranties do not cover: "cosmetic" defects, such as scratches, dents, marring, or fading; damage due to incorrect installation, vandalism, misuse, accident, wear and tear from normal use, exposure to extreme weather; immersion in salt or chlorine water, unauthorized repair or modification, abnormal use, lack of maintenance, or other cause not within Burke's control; and

Limitation of Remedies: Burke is not liable for consequential or incidental damages, including but not limited to labor costs or lost profits resulting from the use of or inability to use the products or from the products being incorporated in or becoming a component of any other product. If, after a reasonable number of repeated efforts, Burke is unable to repair or replace a defective or nonconforming product, Burke shall have the option to accept return of the product, or part thereof, if such does not substantially impair its value, and return the purchase price as the buyer's entire and exclusive remedy. Without limiting the generality of the foregoing, Burke will not be responsible for labor costs involved in the removal of products or the installation of replacement products. Some states do not allow the exclusion of incidental damages, so the above exclusion may not apply to you.

The environment near a saltwater coast can be extremely corrosive. Some corrosion and/or deterioration is considered "normal wear" in this environment. Product installed within 500 yards of a saltwater shoreline will only be covered for half the period of the standard product warranty, up to a maximum of five years, for defects caused by corrosion. Products installed in direct contact with saltwater or that are subjected to salt spray are not covered by the standard warranty for any defects caused by corrosion.

Miracle® uses high quality materials and state of the art manufacturing processes. Commercial playgrounds and products are subjected to years of environmental and solar exposure. Such extreme exposure takes its toll on paints and pigments, and all colors will fade over time. So Miracle® does not warrant against color fading or discoloration. It is important to properly maintain your playground to ensure its longevity. Depending on environmental conditions at your location, the installation of fabric shade structures may help to delay fading and discoloration. Actual colors in catalog may vary due to four color printing process.
